WORLD BANK GROUP

Comparing Business Regulation for Domestic Firms in **190** Economies

Economy Profile of Singapore

Doing Business 2018 Indicators (in order of appearance in the document)

Starting a business	Procedures, time, cost and paid-in minimum capital to start a limited liability company
Dealing with construction permits	Procedures, time and cost to complete all formalities to build a warehouse and the quality control and safety mechanisms in the construction permitting system
Getting electricity	Procedures, time and cost to get connected to the electrical grid, the reliability of the electricity supply and the transparency of tariffs
Registering property	Procedures, time and cost to transfer a property and the quality of the land administration system
Getting credit	Movable collateral laws and credit information systems
Protecting minority investors	Minority shareholders' rights in related-party transactions and in corporate governance
Paying taxes	Payments, time and total tax rate for a firm to comply with all tax regulations as well as post-filing processes
Trading across borders	Time and cost to export the product of comparative advantage and import auto parts
Enforcing contracts	Time and cost to resolve a commercial dispute and the quality of judicial processes
Resolving insolvency	Time, cost, outcome and recovery rate for a commercial insolvency and the strength of the legal framework for insolvency
Labor market regulation	Flexibility in employment regulation and aspects of job quality

About Doing Business

The Doing Business project provides objective measures of business regulations and their enforcement across 190 economies and selected cities at the subnational and regional level.

The Doing Business project, launched in 2002, looks at domestic small and medium-size companies and measures the regulations applying to them through their life cycle.

Doing Business captures several important dimensions of the regulatory environment as it applies to local firms. It provides quantitative indicators on regulation for starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. Doing Business also measures features of labor market regulation. Although Doing Business does not present rankings of economies on the labor market regulation indicators or include the topic in the aggregate distance to frontier score or ranking on the ease of doing business, it does present the data for these indicators.

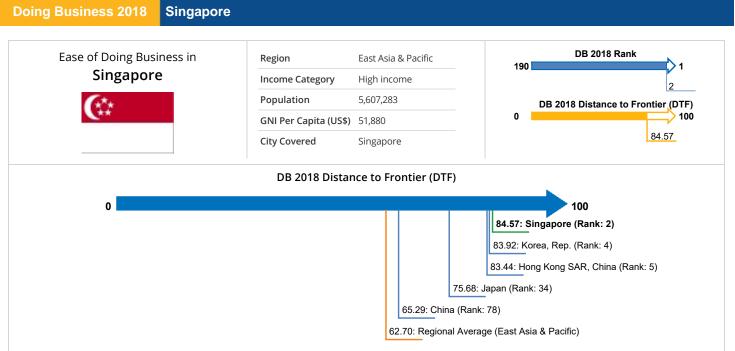

By gathering and analyzing comprehensive quantitative data to compare business regulation environments across economies and over time, Doing Business encourages economies to compete towards more efficient regulation; offers measurable benchmarks for reform; and serves as a resource for academics, journalists, private sector researchers and others interested in the business climate of each economy.

In addition, Doing Business offers detailed subnational reports, which exhaustively cover business regulation and reform in different cities and regions within a nation. These reports provide data on the ease of doing business, rank each location, and recommend reforms to improve performance in each of the indicator areas. Selected cities can compare their business regulations with other cities in the economy or region and with the 190 economies that Doing Business has ranked.

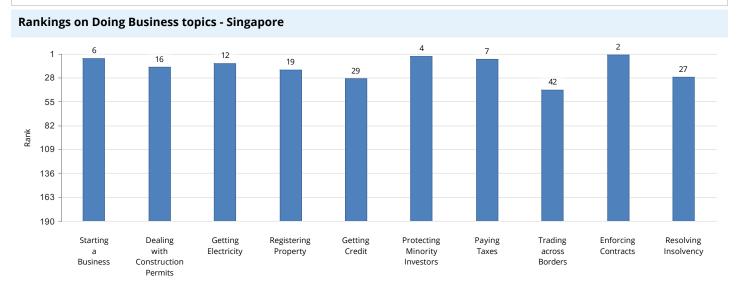

The first Doing Business report, published in 2003, covered 5 indicator sets and 133 economies. This year's report covers 11 indicator sets and 190 economies. Most indicator sets refer to a case scenario in the largest business city of each economy, except for 11 economies that have a population of more than 100 million as of 2013 (Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States) where Doing Business, also collected data for the second largest business city. The data for these 11 economies are a population-weighted average for the 2 largest business cities. The project has benefited from feedback from governments, academics, practitioners and reviewers. The initial goal remains: to provide an objective basis for understanding and improving the regulatory environment for business around the world.

The distance to frontier (DTF) measure shows the distance of each economy to the "frontier," which represents the best performance observed on each of the indicators across all economies in the Doing Business sample since 2005. An economy's distance to frontier is reflected on a scale from 0 to 100, where 0 represents the lowest performance and 100 represents the frontier. The ease of doing business ranking ranges from 1 to 190. The ranking of 190 economies is determined by sorting the aggregate distance to frontier scores, rounded to two decimals.

More about Doing Business (PDF, 5MB)

Note: The distance to frontier (DTF) measure shows the distance of each economy to the "frontier," which represents the best performance observed on each of the indicators across all economies in the Doing Business sample since 2005. An economy's distance to frontier is reflected on a scale from 0 to 100, where 0 represents the lowest performance and 100 represents the frontier. The ease of doing business ranking ranges from 1 to 190.

Distance to Frontier (DTF) on Doing Business topics - Singapore

न Starting a Business

This topic measures the paid-in minimum capital requirement, number of procedures, time and cost for a small- to medium-sized limited liability company to start up and formally operate in economy's largest business city.

To make the data comparable across 190 economies, Doing Business uses a standardized business that is 100% domestically owned, has start-up capital equivalent to 10 times income per capita, engages in general industrial or commercial activities and employs between 10 and 50 people one month after the commencement of operations, all of whom are domestic nationals. Starting a Business considers two types of local limited liability companies that are identical in all aspects, except that one company is owned by 5 married women and the other by 5 married men. The distance to frontier score for each indicator is the average of the scores obtained for each of the component indicators.

The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

What the indicators measure

Procedures to legally start and operate a company (number)

- Pre-registration (for example, name verification or reservation, notarization)
- Registration in economy's largest business city
- Post-registration (for example, social security registration, company seal)
- Obtaining approval from spouse to start business or leave home to register company
- Obtaining any gender-specific permission that can impact company registration, company operations and process of getting national identity card

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day (2 procedures cannot start on the same day)
- Procedures fully completed online are recorded as ½ day
- Procedure is considered completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law or commonly used in practice

Paid-in minimum capital (% of income per capita)

• Funds deposited in a bank or with third party before registration or up to 3 months after incorporation

Case study assumptions

To make the data comparable across economies, several assumptions about the business and the procedures are used. It is assumed that any required information is readily available and that the entrepreneur will pay no bribes.

The business:

- Is a limited liability company (or its legal equivalent). If there is more than one type of limited liability company in the economy, the most common among domestic firms is chosen. Information on the most common form is obtained from incorporation lawyers or the statistical office.

Operates in the economy's largest business city and the entire office space is approximately 929 square meters (10,000 square feet). For 11 economies the data are also collected for the second largest business city.
Is 100% domestically owned and has five owners, none of whom is a legal entity; and has a start-up capital of 10 times income per capita and has a

turnover of at least 100 times income per capita.

- Performs general industrial or commercial activities, such as the production or sale of goods or services to the public. The business does not perform foreign trade activities and does not handle products subject to a special tax regime, for example, liquor or tobacco. It does not use heavily polluting production processes.

- Leases the commercial plant or offices and is not a proprietor of real estate and the amount of the annual lease for the office space is equivalent to 1 times income per capita.

- Does not qualify for investment incentives or any special benefits.

- Has at least 10 and up to 50 employees one month after the commencement of operations, all of whom are domestic nationals.

- Has a company deed 10 pages long.

The owners:

- Have reached the legal age of majority. If there is no legal age of majority, they are assumed to be 30 years old.

- Are sane, competent, in good health and have no criminal record.
- Are married and the marriage is monogamous and registered with the authorities.

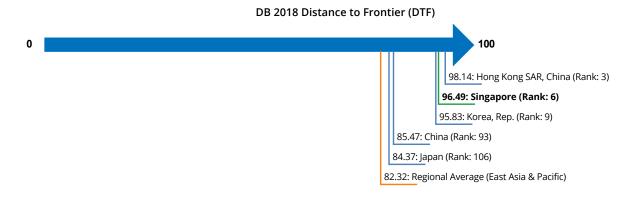

- Where the answer differs according to the legal system applicable to the woman or man in question (as may be the case in economies where there is legal plurality), the answer used will be the one that applies to the majority of the population.

Doing Business 2018 Singapore

Paid-in min. capital (% of income per capita)	0.0	15.1	8.7	0.00 (113 Economies)

Figure – Starting a Business in Singapore and comparator economies – Ranking and DTF

Note: The ranking of economies on the ease of starting a business is determined by sorting their distance to frontier scores for starting a business. These scores are the simple average of the distance to frontier scores for each of the component indicators.

Figure – Starting a Business in Singapore – Procedure, Time and Cost

* This symbol is shown beside procedure numbers that take place simultaneously with the previous procedure.

Note: Online procedures account for 0.5 days in the total time calculation. For economies that have a different procedure list for men and women, the graph shows the time for women. For more information on methodology, see the Doing Business website (http://www.doingbusiness.org/methodology). For details on the procedures reflected here, see the summary below.

Details – Starting a Business in Singapore – Procedure, Time and Cost

No.	Procedure	Time to Complete	Associated Costs
1	Registration on-line with ACRA including company name search and filing the company incorporation and tax number (GST) Agency : ACRA	Less than one day (online procedure)	SGD 315
	The Accounting and Corporate Regulatory Authority (ACRA) is the national regulator of businesses and public accountants in Singapore. Incorporation is done through Bizfile, an electronic filing system. An application for the approval and reservation of a company name is to be submitted online via Bizfile. Since 2007, Bizfile has been providing one-stop business facilitation services to customers at the point of registration. These services include reserving domain names, goods and services tax (GST) registration, subscribing for the relevant e-newsletter and registering for e-service alerts on latest government procurement opportunities, activating Customs Account and application for a corporate bank account. An application fee of SGD 15 is payable for each approved company name. It can generally be completed within an hour after payment online. Once a name has been approved, it will be reserved for 60 days. A one-time application for the extension of the reservation period by a further 60 days can be made before the expiry date.		
	Entrepreneurs registering a new business can purchase the Business Profile on line at the same time of registration, when filling up the incorporation forms. The processing time is about 15 minutes from the time of successful submission of all documents and all information, and the registration fee payable is SGD 300. The ACRA will issue a notice of incorporation via electronic mail to the law firm or professional firm engaged for the purposes of incorporation upon the successful incorporation of the company together with the registration number of the company. The registration with the Inland Revenue Authority of Singapore (IRAS) for the goods and services tax (GST) when (a) its annual taxable turnover exceeds SGD 1 million can be done using the same online forms.		
	Make a company seal Agency : Seal maker The company seal is not mandatory but it is still a common practice for entrepreneurs. It is generally obtained from the company seal manufacturers. Generally a market rate of SGD 40 will be charged if the seal is to be collected within 3 days or approximately SGD 70 if the seal is to be collected within 1 day	1 day	SGD 70

3	Sign up for Employee Compensation Insurance at an insurance agency Agency : Insurance Agency	1 day	no charge
	Under Section 23(1) of the Work Injury Compensation Act (WICA), Chapter 354, of Singapore, every employer shall insure and maintain insurance under one or more approved policies with an insurer against all liabilities which the company may incur under the provisions of this Act in respect of any employee employed by the company unless the Minister, by notification in the Gazette, waives the requirement of such insurance in relation to any employer.		
	Time and cost may depend on the arrangement between the company and the insurance agency.		

Q Applies to women only.

 \Rightarrow Takes place simultaneously with previous procedure.

Dealing with Construction Permits

This topic tracks the procedures, time and cost to build a warehouse—including obtaining necessary the licenses and permits, submitting all required notifications, requesting and receiving all necessary inspections and obtaining utility connections. In addition, the Dealing with Construction Permits indicator measures the building quality control index, evaluating the quality of building regulations, the strength of quality control and safety mechanisms, liability and insurance regimes, and professional certification requirements. The most recent round of data collection was completed in June 2017. See the methodology for more information

What the indicators measure

Procedures to legally build a warehouse (number)

- Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates
- Submitting all required notifications and receiving all necessary inspections
- Obtaining utility connections for water and sewerage
- Registering and selling the warehouse after its completion

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day though procedures that can be fully completed online are an exception to this rule
- Procedure is considered completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of warehouse value)

• Official costs only, no bribes

Building quality control index (0-15)

- Sum of the scores of six component indices:
- Quality of building regulations (0-2)
- Quality control before construction (0-1)
- Quality control during construction (0-3)
- Quality control after construction (0-3)
- Liability and insurance regimes (0-2)
- Professional certifications (0-4)

Case study assumptions

To make the data comparable across economies, several assumptions about the construction company, the warehouse project and the utility connections are used.

The construction company (BuildCo):

- Is a limited liability company (or its legal equivalent) and operates in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.

- Is 100% domestically and privately owned; has five owners, none of whom is a legal entity. Has a licensed architect and a licensed engineer, both registered with the local association of architects or engineers. BuildCo is not assumed to have any other employees who are technical or licensed experts, such as geological or topographical experts.

- Owns the land on which the warehouse will be built and will sell the warehouse upon its completion.

The warehouse:

- Will be used for general storage activities, such as storage of books or stationery.

- Will have two stories, both above ground, with a total constructed area of approximately 1,300.6 square meters (14,000 square feet). Each floor will be 3 meters (9 feet, 10 inches) high and will be located on a land plot of approximately 929 square meters (10,000 square feet) that is 100% owned by BuildCo, and the warehouse is valued at 50 times income per capita.

- Will have complete architectural and technical plans prepared by a licensed architect. If preparation of the plans requires such steps as obtaining further documentation or getting prior approvals from external agencies, these are counted as procedures.

- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

The water and sewerage connections:

- Will be 150 meters (492 feet) from the existing water source and sewer tap. If there is no water delivery infrastructure in the economy, a borehole will be dug. If there is no sewerage infrastructure, a septic tank in the smallest size available will be installed or built.

- Will have an average water use of 662 liters (175 gallons) a day and an average wastewater flow of 568 liters (150 gallons) a day. Will have a peak water use of 1,325 liters (350 gallons) a day and a peak wastewater flow of 1,136 liters (300 gallons) a day.

- Will have a constant level of water demand and wastewater flow throughout the year; will be 1 inch in diameter for the water connection and 4 inches in diameter for the sewerage connection.

For more information on methodology, see the Doing Business website (http://www.doingbusiness.org/methodology). For details on the procedures reflected here, see the summary below.

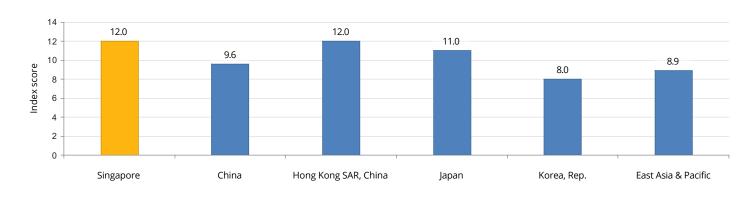

Figure – Dealing with Construction Permits in Singapore and comparator economies – Measure of Quality

Details – Dealing with Construction Permits in Singapore – Procedure, Time and Cost

No.	Procedure	Time to Complete	Associated Costs
1	Obtain a Geo-technical study / Soil test Agency : Private firms BuildCo will request a soil test for the structural calculations for the foundation.	7 days	SGD 2,000
	Hire certified Qualified Professionals to apply for project approvals and supervise construction	1 day	SGD 205,399
	Agency : Private Firm		
	BuildCo. must hire an independent, external and certified Qualified Professional in order to carry out project approvals, apply for and obtain the building permit and supervise construction.		

3 Obtain written permission from the Urban Redevelopment Authority

Agency : Urban Redevelopment Authority

The application for permission from the Urban Redevelopment Authority (URA) can be done electronically by a Qualified Professional (QP) through the CORENET Electronic Development Applications (EDA) system. The company must submit a digital EDA form, along with the following:

- Proposal and sketch plans for the development
- Survey plans for sloping or undulating sites

Companies can apply to URA via two schemes: Normal and Plan Lodgment Scheme. Launched in 1995, the Plan Lodgment Scheme allows for projects that fulfill the qualifying criteria (see http://www.ura.gov.sg/dc/lodgment/dclodgment-hdb_itc.htm) to be submitted and approved online immediately. The application is made either through JTC system or through URA's EDA system. The fees for a plan lodgment are SGD 800.00 plus 7% GST. The Plan Lodgment Scheme is applicable to industrial and warehouse development on land owned by JTC and the HDB, which forms about 90% of industrial land in Singapore. All Qualified Persons (i.e. Architects or Engineers) are allowed to submit their development proposals under the Plan Lodgment Scheme. There is no restriction on the size or type of the industrial developments or the QP's firms. In 2007, nearly 70% (562 out of 830) of the industrial and warehouse development proposals were eligible for approval under the Plan Lodgment Scheme. However, if the land is not under either JTC or Housing and Development Board scheme (HDB is for residential developments), and under freehold ownership the application would go through a normal clearance process.

Although the application submitted under the normal scheme itself takes 1 day, it takes on average about 14 days for the URA to process it and grant permission. URA does not have a time limit, but rather operates under a targeted threshold. According to that target 90% of cases must be cleared in 4 weeks. The written permission is valid for 2 years, during which time the work must be completed.

The application fee for normal process is SGD 2,500.00 for the first 1,000 sq. m. and SGD 60.00 for each additional 100 sq. m. (plus 7% general service tax which is not included in the case study).

The case considered here assumes a commercial warehouse for storing books, which would be classified as a Group 3 land-intensive development.

A fee schedule is available at http://www.ura.gov.sg/forms/doc/dc-fee2007.pdf.

4 Obtain structural and architectural plan approvals and building commencement permit, building fire plan approval from FSSD, environmental clearance from NEA and clearance of parking proposal from the Land Transport Authority

Agency : Building & Construction Authority (BCA)

Qualified Professionals submit the structural plans through CORENET system operated by the Building and Construction Authority (BCA). The permit will not be issued without the written or provisional permission from the Urban Redevelopment Authority (URA) and payment of any development charges, if applicable. Most companies submit their application to URA and BCA for structural approval at the same time. They can time it in a way that the structural approval is granted a day after the URA issues planning permission. Construction work must commence within 24 months from the approval date.

The structural plan approval can be granted along with the building commencement permit that gives the right to physically begin the construction.

Since 2008 the BCA runs a data management module in its application processing system to monitor its performance standard. It also introduced mobile phone short message and e-mail notification to inform the applicants of their applications status instantaneously.

Since September 1, 2005, the fee schedule is as follows: • SGD 300.00 per 100 sq. m. for the first 2,500 sq. m. of standard gross floor area (SGFA)

• SGD 200.00 for each subsequent 100 sq. m. of SGFA

Hence, in this case, the total fee charged for 1,300 sq. m. is 13 x SGD 300.00 = SGD 3,900.00

Which parties (if any) are required by law to obtain an insurance policy to cover possible structural flaws or problems in the building once it is in use (Latent Defect Liability Insurance or Decennial Insurance)? (0-1)	No party is required by law to obtain insurance .	0.0
Professional certifications index (0-4)		4.0
What are the qualification requirements for the professional responsible for verifying that the architectural plans or drawings are in compliance with existing building regulations? (0-2)	Minimum number of years of experience; University degree in architecture or engineering; Being a registered architect or engineer; Passing a certification exam.	2.0
What are the qualification requirements for the professional who supervises the construction on the ground? (0-2)	Minimum number of years of experience; University degree in engineering, construction or construction management; Being a registered architect or engineer; Passing a certification exam.	2.0

Getting Electricity

This topic measures the procedures, time and cost required for a business to obtain a permanent electricity connection for a newly constructed warehouse. Additionally, the reliability of supply and transparency of tariffs index measures reliability of supply, transparency of tariffs and the price of electricity. The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

What the indicators measure

Procedures to obtain an electricity connection (number)

- Submitting all relevant documents and obtaining all necessary clearances and permits
- Completing all required notifications and receiving all necessary inspections
- Obtaining external installation works and possibly purchasing material for these works
- Concluding any necessary supply contract and obtaining final supply

Time required to complete each procedure (calendar days)

- Is at least 1 calendar day
- Each procedure starts on a separate day
- Does not include time spent gathering information
- Reflects the time spent in practice, with little follow-up and no prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- Value added tax excluded

The reliability of supply and transparency of tariffs index (0-8)

- Duration and frequency of power outages (0–3)
- Tools to monitor power outages (0–1)
- Tools to restore power supply (0–1)
- Regulatory monitoring of utilities' performance (0–1)
- Financial deterrents limiting outages (0–1)
- Transparency and accessibility of tariffs (0–1)

Price of electricity (cents per kilowatt-hour)*

• Price based on monthly bill for commercial warehouse in case study

*Note: Doing Business measures the price of electricity, but it is not included in the distance to frontier score nor the ranking on the ease of getting electricity.

Case study assumptions

To make the data comparable across economies, several assumptions are used.

The warehouse:

- Is owned by a local entrepreneur and is used for storage of goods.
- Is located in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Is located in an area where similar warehouses are typically located and is in an area with no physical constraints. For example, the property is not near a railway.
- Is a new construction and is being connected to electricity for the first time.

- Has two stories with a total surface area of approximately 1,300.6 square meters (14,000 square feet). The plot of land on which it is built is 929 square meters (10,000 square feet).

The electricity connection:

- Is a permanent one with a three-phase, four-wire Y connection with a subscribed capacity of 140-kilo-volt-ampere (kVA) with a power factor of 1, when 1 kVA = 1 kilowatt (kW).

- Has a length of 150 meters. The connection is to either the low- or medium-voltage distribution network and is either overhead or underground, whichever is more common in the area where the warehouse is located and requires works that involve the crossing of a 10-meter road (such as by excavation or overhead lines) but are all carried out on public land. There is no crossing of other owners' private property because the warehouse has access to a road.

- Does not require work to install the internal wiring of the warehouse. This has already been completed up to and including the customer's service panel or switchboard and the meter base.

The monthly consumption:

- It is assumed that the warehouse operates 30 days a month from 9:00 a.m. to 5:00 p.m. (8 hours a day), with equipment utilized at 80% of capacity on average and that there are no electricity cuts (assumed for simplicity reasons) and the monthly energy consumption is 26,880 kilowatt-hours (kWh); hourly consumption is 112 kWh.

- If multiple electricity suppliers exist, the warehouse is served by the cheapest supplier.

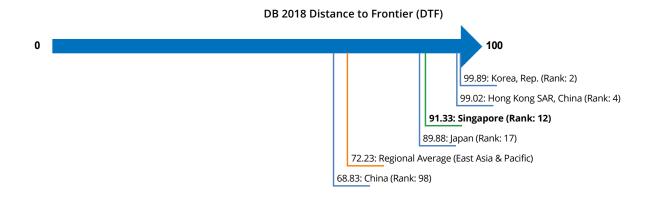

- Tariffs effective in March of the current year are used for calculation of the price of electricity for the warehouse. Although March has 31 days, for calculation purposes only 30 days are used.

Details – Getting Electricity in Singapore – Procedure, Time and Cost

No.	Procedure	Time to Complete	Associated Costs
1	Submit application to SP Services Ltd. and await estimate Agency : SP Services Ltd	9 calendar days	SGD 0
	The customer has to engage and appoint an Electrical Worker licensed (LEW) with the Energy Market Authority (EMA) to design the internal electrical installation, a LEW for the electrical installation works, and a LEW to operate on the installation. The client can appoint the same LEW for all three duties. The LEW essentially acts as the client's agent for the connection to the grid system.		
	There are three classes of LEWs, namely licensed electricians (load < 45kVA), licensed electrical technicians (load design < 150kVA) and licensed electrical engineers (no limit on load). Based on the case study's load (140kVA), the customer needs to appoint either a licensed electrical technician or licensed electrical engineer.		
	The appointed LEW submits an application to SP Services Ltd to connect to the grid system, along with 2 copies of the site plan. SP Services Ltd advises the appointed LEW on the approval of the application and provides them with a quotation for the premises to receive service connection from the streets mains.		
	SP Services Ltd serves as a one-stop customer center for electricity connections. It receives electricity supply applications, payment of connection fees, opens electricity accounts and makes turn-on appointment with customers. Direct service connection from SP PowerGrid's LV network to the client's installation is available for a small load requirement not exceeding 280kVA (400A) in commercial or industrial areas.		

2 Open electricity account, pay connection fee and receive external works

21 calendar days

SGD 17,794.08

Agency : SP Services Ltd (works by SP Power Grid Ltd)

Once SP Power Group offers the terms and conditions of the connection, SP Services will liaise with the LEW so he/she can open an account and pay the connection fee - which are done on the same day. The external works from SP PowerGrid Ltd commence automatically upon payment of the connection fee. No further action is required from the customer.

The documents required for opening of account are:

- Completed and signed application form;
- Copy of business/company registration certificate;

- Copy of NRIC/FIN (National Registration Identity Card / Foreign Identification Number) for the authorized signatory of company representative or a letter of authorization issued by the company indicating the company representative's name and NRIC/FIN, proof of ownership or tenancy agreement;

- Letter from the Authority (Inland Revenue Authority of Singapore) confirming the official address of the premises, and

- Initial security deposit in cash (which is refundable when the customer terminates the account) or by the form of banker Guarantee (BG) at the point of application;

For the warehouse, a direct connection is applicable as the applied load is 140 kVA. Services for the provision of electricity supply from the existing overground box to the industrial premises with load demand between 76 kVA and 140 kVA will be managed as follows by SP Services Ltd and SP PowerGrid Ltd:

a. Upon receipt of the connection fee payment by SP Services Ltd, SP PowerGrid Ltd will commence work and inform the appointed LEW and the client about the date for fixing meter and turn-on of electricity supply. The customer's appointed LEW has to submit the document required for turn-on of supply before the turn-on date.

b. The service provided is underground. An excavation permit is thus needed before SP PowerGrid Ltd can start laying cables. For pragmatic reasons, SP PowerGrid will only apply for the permit after the client has made the connection fee payment and had their intake point ready for connection. SP PowerGrid Ltd works closely with the agencies to have the road openings approved within 7 calendar days and then commence the physical cable installation work;

c. SP PowerGrid Ltd will carry out meter fixing once the cable installation work is started;

d. The service cable will be energised on the next day after the cable installation work is completed -- provided that a certificate of compliance (COC) has been lodged.

Details – Getting Electricity in Singapore – Measure of Quality

	Answer
Reliability of supply and transparency of tariff index (0-8)	7
Total duration and frequency of outages per customer a year (0-3)	3
System average interruption duration index (SAIDI)	0.0
System average interruption frequency index (SAIFI)	0.0
What is the minimum outage time (in minutes) that the utility considers for the calculation of SAIDI/SAIFI	1.0
Mechanisms for monitoring outages (0-1)	1
Does the distribution utility use automated tools to monitor outages?	Yes
Mechanisms for restoring service (0-1)	1
Does the distribution utility use automated tools to restore service?	Yes
Regulatory monitoring (0-1)	1
Does a regulator—that is, an entity separate from the utility—monitor the utility's performance on reliability of supply?	Yes
Financial deterrents aimed at limiting outages (0-1)	1
Does the utility either pay compensation to customers or face fines by the regulator (or both) if outages exceed a certain cap?	Yes
Communication of tariffs and tariff changes (0-1)	0
Are effective tariffs available online?	Yes
Link to the website, if available online	https://www.emcsg.c om/
Are customers notified of a change in tariff ahead of the billing cycle?	No

Note:

If the duration and frequency of outages is 100 or less, the economy is eligible to score on the Reliability of supply and transparency of tariff index.

If the duration and frequency of outages is not available, or is over 100, the economy is not eligible to score on the index.

If the minimum outage time considered for SAIDI/SAIFI is over 5 minutes, the economy is not eligible to score on the index.

🏥 Registering Property

This topic examines the steps, time and cost involved in registering property, assuming a standardized case of an entrepreneur who wants to purchase land and a building that is already registered and free of title dispute. In addition, the topic also measures the quality of the land administration system in each economy. The quality of land administration index has five dimensions: reliability of infrastructure, transparency of information, geographic coverage, land dispute resolution, and equal access to property rights. The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

What the indicators measure

Procedures to legally transfer title on immovable property (number)

- Preregistration procedures (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)
- Registration procedures in the economy's largest business citya.
- Postregistration procedures (for example, filling title with municipality)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day though procedures that can be fully completed online are an exception to this rule
- Procedure is considered completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of property value)

- Official costs only (such as administrative fees, duties and taxes).
- Value Added Tax, Capital Gains Tax and illicit payments are excluded

Quality of land administration index (0-30)

- Reliability of infrastructure index (0-8)
- Transparency of information index (0–6)
- Geographic coverage index (0–8)
- Land dispute resolution index (0-8)
- Equal access to property rights index (-2-0)

Case study assumptions

To make the data comparable across economies, several assumptions about the parties to the transaction, the property and the procedures are used.

The parties (buyer and seller):

- Are limited liability companies (or the legal equivalent).

- Are located in the periurban area of the economy's largest business city. For 11 economies the data are also collected for the second largest business city.

- Are 100% domestically and privately owned.
- Have 50 employees each, all of whom are nationals.
- Perform general commercial activities.

The property (fully owned by the seller):

- Has a value of 50 times income per capita, which equals the sale price.

- Is fully owned by the seller.

- Has no mortgages attached and has been under the same ownership for the past 10 years.

- Is registered in the land registry or cadastre, or both, and is free of title disputes.

- Is located in a periurban commercial zone, and no rezoning is required.

- Consists of land and a building. The land area is 557.4 square meters (6,000 square feet). A two-story warehouse of 929 square meters (10,000 square feet) is located on the land. The warehouse is 10 years old, is in good condition, has no heating system and complies with all safety standards, building codes and legal requirements. The property, consisting of land and building, will be transferred in its entirety.

- Will not be subject to renovations or additional construction following the purchase.

- Has no trees, natural water sources, natural reserves or historical monuments of any kind.

- Will not be used for special purposes, and no special permits, such as for residential use, industrial plants, waste storage or certain types of agricultural activities, are required.

- Has no occupants, and no other party holds a legal interest in it.

Geographic coverage index (0–8)		8.0

Doing Business 2018 Singapore		
Are all privately held land plots in the economy formally registered at the immovable property registry?	Yes	2.0
Are all privately held land plots in the largest business city formally registered at the immovable property registry?	Yes	2.0
Are all privately held land plots in the economy mapped?	Yes	2.0
Are all privately held land plots in the largest business city mapped?	Yes	2.0
Land dispute resolution index (0–8)		7.0
Does the law require that all property sale transactions be registered at the immovable property registry to make them opposable to third parties?	Yes	1.5
Is the system of immovable property registration subject to a state or private guarantee?	Yes	0.5
Is there a specific compensation mechanism to cover for losses incurred by parties who engaged in good faith in a property transaction based on erroneous information certified by the immovable property registry?	Yes	0.5
Does the legal system require a control of legality of the documents necessary for a property transaction (e.g., checking the compliance of contracts with requirements of the law)?	Yes	0.5
If yes, who is responsible for checking the legality of the documents?	Registrar; Lawyer.	
Does the legal system require verification of the identity of the parties to a property transaction?	Yes	0.5
If yes, who is responsible for verifying the identity of the parties?	Lawyer.	
Is there a national database to verify the accuracy of identity documents?	Yes	1.0
For a standard land dispute between two local businesses over tenure rights of a property worth 50 times gross national income (GNI) per capita and located in the largest business city, what court would be in charge of the case in the first instance?	Supreme Court	
How long does it take on average to obtain a decision from the first-instance court for such a case (without appeal)?	Between 1 and 2 years	2.0
Are there any statistics on the number of land disputes in the first instance?	Yes	0.5
Number of land disputes in the largest business city in 2015:	218.0	
Equal access to property rights index (-2–0)		0.0
Do unmarried men and unmarried women have equal ownership rights to property?	Yes	0.0
Do married men and married women have equal ownership rights to property?	Yes	0.0

💳 Getting Credit

This topic explores two sets of issues—the strength of credit reporting systems and the effectiveness of collateral and bankruptcy laws in facilitating lending. The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

What the indicators measure

Strength of legal rights index (0-12)

- Rights of borrowers and lenders through collateral laws (0-10)
- Protection of secured creditors' rights through bankruptcy laws (0-2)

Depth of credit information index (0-8)

• Scope and accessibility of credit information distributed by credit bureaus and credit registries (0-8)

Credit bureau coverage (% of adults)

• Number of individuals and firms listed in largest credit bureau as a percentage of adult population

Credit registry coverage (% of adults)

• Number of individuals and firms listed in credit registry as a percentage of adult population

Case study assumptions

Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. For each economy it is first determined whether a unitary secured transactions system exists. Then two case scenarios, case A and case B, are used to determine how a nonpossessory security interest is created, publicized and enforced according to the law. Special emphasis is given to how the collateral registry operates (if registration of security interests is possible). The case scenarios involve a secured borrower, company ABC, and a secured lender, BizBank.

In some economies the legal framework for secured transactions will allow only case A or case B (not both) to apply. Both cases examine the same set of legal provisions relating to the use of movable collateral.

Several assumptions about the secured borrower (ABC) and lender (BizBank) are used:

- ABC is a domestic limited liability company (or its legal equivalent).
- ABC has up to 50 employees.

- ABC has its headquarters and only base of operations in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.

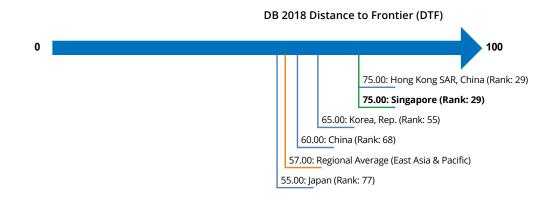

- Both ABC and BizBank are 100% domestically owned.

The case scenarios also involve assumptions. In case A, as collateral for the loan, ABC grants BizBank a nonpossessory security interest in one category of movable assets, for example, its machinery or its inventory. ABC wants to keep both possession and ownership of the collateral. In economies where the law does not allow nonpossessory security interests in movable property, ABC and BizBank use a fiduciary transfer-of-title arrangement (or a similar substitute for nonpossessory security interests).

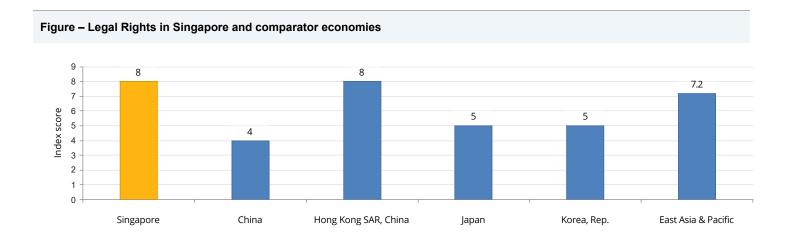

In case B, ABC grants BizBank a business charge, enterprise charge, floating charge or any charge that gives BizBank a security interest over ABC's combined movable assets (or as much of ABC's movable assets as possible). ABC keeps ownership and possession of the assets.

Figure – Getting Credit in Singapore and comparator economies – Ranking and DTF

Note: The ranking of economies on the ease of getting credit is determined by sorting their distance to frontier scores for getting credit. These scores are the distance to frontier score for the sum of the strength of legal rights index and the depth of credit information index.

Details - Legal Rights in Singapore

s	trength of legal rights index (0-12)	8
	Does an integrated or unified legal framework for secured transactions that extends to the creation, publicity and enforcement of functional equivalents to security interests in movable assets exist in the economy?	No
	Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral?	Yes
	Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral?	Yes
	May a security right extend to future or after-acquired assets, and does it extend automatically to the products, proceeds or replacements of the original assets?	Yes
	ls a general description of debts and obligations permitted in collateral agreements; can all types of debts and obligations be secured between parties; and can the collateral agreement include a maximum amount for which the assets are encumbered?	Yes
	Is a collateral registry in operation for both incorporated and non-incorporated entities, that is unified geographically and by asset type, with an electronic database indexed by debtor's name?	No
	Does a notice-based collateral registry exist in which all functional equivalents can be registered?	No
	Does a modern collateral registry exist in which registrations, amendments, cancellations and searches can be performed online by any interested third party?	Yes
	Are secured creditors paid first (i.e. before tax claims and employee claims) when a debtor defaults outside an insolvency procedure?	Yes
	Are secured creditors paid first (i.e. before tax claims and employee claims) when a business is liquidated?	Yes
	Are secured creditors subject to an automatic stay on enforcement when a debtor enters a court-supervised reorganization procedure? Does the law protect secured creditors' rights by providing clear grounds for relief from the stay and/or sets a time limit for it?	No
	Does the law allow parties to agree on out of court enforcement at the time a security interest is created? Does the law allow the secured creditor to sell the collateral through public auction or private tender, as well as, for the secured	Yes

creditor to keep the asset in satisfaction of the debt?

Are both positive and negative credit data distributed?	Yes	No	1
Are data from retailers or utility companies - in addition to data from banks and financial institutions - distributed?	No	No	0
Are at least 2 years of historical data distributed? (Credit bureaus and registries that distribute more than 10 years of negative data or erase data on defaults as soon as they are repaid obtain a score of 0 for this component.)	Yes	No	1
Are data on loan amounts below 1% of income per capita distributed?	Yes	No	1
By law, do borrowers have the right to access their data in the credit bureau or credit registry?	Yes	No	1
Can banks and financial institutions access borrowers' credit information online (for example, through an online platform, a system-to-system connection or both)?	Yes	No	1
Are bureau or registry credit scores offered as a value-added service to help banks and financial institutions assess the creditworthiness of borrowers?	Yes	No	1
Score ("yes" to either public bureau or private registry)			7

Note: An economy receives a score of 1 if there is a "yes" to either bureau or registry. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.

Coverage	Credit bureau	Credit registry
Number of individuals	2,269,854	0
Number of firms	482,000	0
Total	2,751,854	0
Percentage of adult population	67.8	0.0

Protecting Minority Investors

This topic measures the strength of minority shareholder protections against misuse of corporate assets by directors for their personal gain as well as shareholder rights, governance safeguards and corporate transparency requirements that reduce the risk of abuse. The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

What the indicators measure

- Extent of disclosure index (0–10): Review and approval requirements for related-party transactions; Disclosure requirements for related-party transactions
- Extent of director liability index (0-10): Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)
- Ease of shareholder suits index (0-10): Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses
- Extent of conflict of interest regulation index (0–10): Simple average of the extent of disclosure, extent of director liability and ease of shareholder indices
- Extent of shareholder rights index (0-10): Shareholders' rights and role in major corporate decisions
- Extent of ownership and control index (0-10): Governance safeguards protecting shareholders from undue board control and entrenchment
- Extent of corporate transparency index (0-10): Corporate transparency on ownership stakes, compensation, audits and financial prospects
- Extent of shareholder governance index (0-10): Simple average of the extent of shareholders rights, extent of ownership and control and extent of corporate transparency indices
- Strength of minority investor protection index (0–10): Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices

Case study assumptions

To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange. If the number of publicly traded companies listed on that exchange is less than 10, or if there is no stock exchange in the economy, it is assumed that Buyer is a large private company with multiple shareholders.

- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

- Has a supervisory board (applicable to economies with a two-tier board system) on which 60% of the shareholder-elected members have been appointed by Mr. James, who is Buyer's controlling shareholder and a member of Buyer's board of directors.

- Has not adopted any bylaws or articles of association that differ from default minimum standards and does not follow any nonmandatory codes, principles, recommendations or guidelines relating to corporate governance.

- Is a manufacturing company with its own distribution network.

The transaction involves the following details:

- Mr. James owns 60% of Buyer and elected two directors to Buyer's fivemember board.

- Mr. James also owns 90% of Seller, a company that operates a chain of retail hardware stores. Seller recently closed a large number of its stores.

- Mr. James proposes that Buyer purchase Seller's unused fleet of trucks to expand Buyer's distribution of its food products, a proposal to which Buyer agrees. The price is equal to 10% of Buyer's assets and is higher than the market value.

- The proposed transaction is part of the company's ordinary course of business and is not outside the authority of the company.

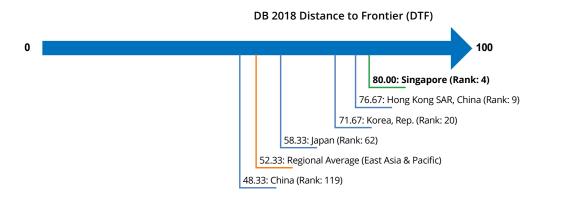

- Buyer enters into the transaction. All required approvals are obtained, and all required disclosures made (that is, the transaction is not fraudulent).

- The transaction causes damages to Buyer. Shareholders sue Mr. James and the other parties that approved the transaction.

Doing Business 2018 Singapore

Indicator	Singapore	East Asia & Pacific	1	OECD high income	Ove	rall Best Performer
Extent of conflict of interest regulation index (0- 10)	9	9.3	5.7		6.4	9.3 (New Zealand)
Extent of shareholder governance index (0-10)		6.7	4.8		6.4	9.00 (Kazakhstan)

Figure – Protecting Minority Investors in Singapore and comparator economies – Ranking and DTF

Note: The ranking of economies on the strength of minority investor protections is determined by sorting their distance to frontier scores for protecting minority investors. These scores are the simple average of the distance to frontier scores for the extent of conflict of interest regulation index and the extent of shareholder governance index.

	Answer	Score
Extent of conflict of interest regulation index (0-10)		9.3
Extent of disclosure index (0-10)		10
Which corporate body is legally sufficient to approve the Buyer-Seller transaction? (0-3)	Shareholders excluding interested parties	3.0
Must an external body review the terms of the transaction before it takes place? (0-1)	Yes	1.0
Must Mr. James disclose his conflict of interest to the board of directors? (0-2)	Full disclosure of all material facts	2.0
Must Buyer disclose the transaction in published periodic filings (annual reports)? (0-2)	Disclosure on the transaction and on the conflict of interest	2.0
Must Buyer immediately disclose the transaction to the public and/or shareholders? (0-2)	Disclosure on the transaction and on the conflict of interest	2.0
Extent of director liability index (0-10)		9
Can shareholders representing 10% of Buyer's share capital sue directly or derivatively for the damage the transaction caused to Buyer? (0-1)	Yes	1.0
Can shareholders hold the interested director liable for the damage the transaction caused to Buyer? (0-2)	Liable if unfair or prejudicial	2.0
Can shareholders hold the other directors liable for the damage the transaction caused to Buyer (0-2)	Liable if unfair or prejudicial	2.0
Must Mr. James pay damages for the harm caused to Buyer upon a successful claim by shareholders? (0-1)	Yes	1.0
Must Mr. James repay profits made from the transaction upon a successful claim by	Yes	1.0
shareholders? (0-1)		
	Yes	1.0
shareholders? (0-1) Is Mr. James disqualified or fined and imprisoned upon a successful claim by	Yes Voidable if negligently concluded	1.0

Doing Business 2018 Singapore		
Before suing can shareholders representing 10% of Buyer's share capital inspect the transaction documents? (0-1)	Yes	1.0
Can the plaintiff obtain any documents from the defendant and witnesses at trial? (0-3)	Any relevant document	3.0
Can the plaintiff request categories of documents from the defendant without identifying specific ones? (0-1)	Yes	1.0
Can the plaintiff directly question the defendant and witnesses at trial? (0-2)	Yes	2.0
Is the level of proof required for civil suits lower than that of criminal cases? (0-1)	Yes	1.0
Can shareholder plaintiffs recover their legal expenses from the company? (0-2)	Yes if successful	1.0
Extent of shareholder governance index (0-10)		6.7
Extent of shareholder rights index (0-10)		7
Does the sale of 51% of Buyer's assets require shareholder approval?	Yes	1.0
Can shareholders representing 10% of Buyer's share capital call for a meeting of shareholders?	Yes	1.0
Must Buyer obtain its shareholders' approval every time it issues new shares?	Yes	1.0
Do shareholders automatically receive preemption rights every time Buyer issues new shares?	No	0.0
Must shareholders approve the election and dismissal of the external auditor?	Yes	1.0
Are changes to the rights of a class of shares only possible if the holders of the affected shares approve?	Yes	1.0
Assuming that Buyer is a limited company, does the sale of 51% of its assets require member approval?	No	0.0
Assuming that Buyer is a limited company, can members representing 10% call for a meeting of members?	Yes	1.0
Assuming that Buyer is a limited company, must all members consent to add a new member?	Yes	1.0
Assuming that Buyer is a limited company, must a member first offer to sell their interest to the existing members before they can sell to non-members?	No	0.0
Extent of ownership and control index (0-10)		5
Is it forbidden to appoint the same individual as CEO and chair of the board of directors?	No	0.0
Must the board of directors include independent and nonexecutive board members?	Yes	1.0
Can shareholders remove members of the board of directors without cause before the end of their term?	Yes	1.0
Must the board of directors include a separate audit committee exclusively comprising board members?	Yes	1.0

Doing Business 2018 Singapore		
Must a potential acquirer make a tender offer to all shareholders upon acquiring 50% of Buyer?	Yes	1.0
Must Buyer pay declared dividends within a maximum period set by law?	No	0.0
Is a subsidiary prohibited from acquiring shares issued by its parent company?	Yes	1.0
Assuming that Buyer is a limited company, must Buyer have a mechanism to resolve disagreements among members?	No	0.0
Assuming that Buyer is a limited company, must a potential acquirer make a tender offer to all shareholders upon acquiring 50% of Buyer?	No	0.0
Assuming that Buyer is a limited company, must Buyer distribute profits within a maximum period set by law?	No	0.0
Extent of corporate transparency index (0-10)		8
Must Buyer disclose direct and indirect beneficial ownership stakes representing 5%?	Yes	1.0
Must Buyer disclose information about board members' primary employment and directorships in other companies?	Yes	1.0
Must Buyer disclose the compensation of individual managers?	No	0.0
Must a detailed notice of general meeting be sent 21 days before the meeting?	No	0.0
Can shareholders representing 5% of Buyer's share capital put items on the general meeting agenda?	Yes	1.0
Must Buyer's annual financial statements be audited by an external auditor?	Yes	1.0
Must Buyer disclose its audit reports to the public?	Yes	1.0
Assuming that Buyer is a limited company, must members meet at least once a year?	Yes	1.0
Assuming that Buyer is a limited company, can members representing 5% put items on the meeting agenda?	Yes	1.0
Assuming that Buyer is a limited company, must Buyer's annual financial statements be audited by an external auditor?	Yes	1.0

Paying Taxes

This topic records the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year, as well as measures the administrative burden in paying taxes and contributions. The most recent round of data collection for the project was completed on June 30, 2017 covering for the Paying Taxes indicator calendar year 2016 (January 1, 2016 – December 31, 2016).

Last year (Doing Business 2017) the scope of data collection was expanded to better understand the overall tax environment in an economy. The questionnaire was expanded to include new questions on post-filing processes: VAT refund and tax audit. The data shows where postfiling processes and practices work efficiently and what drives the differences in the overall tax compliance cost across economies.

The new section covers both the legal framework and the administrative burden on businesses to comply with postfiling processes. See the methodology for more information.

What the indicators measure

Tax payments for a manufacturing company in 2016 (number per year adjusted for electronic and joint filing and payment)

- Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)
- Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

- Collecting information, computing tax payable
- Completing tax return, filing with agencies
- Arranging payment or withholding
- Preparing separate tax accounting books, if required

Total tax and contribution rate (% of profit before all taxes)

- Profit or corporate income tax
- Social contributions, labor taxes paid by employer
- Property and property transfer taxes
- Dividend, capital gains, financial transactions taxes
- Waste collection, vehicle, road and other taxes

Postfiling Index

- Time to comply with a VAT refund
- Time to receive a VAT refund
- Time to comply with a corporate income tax audit
- Time to complete a corporate income tax audit

Case study assumptions

Using a case scenario, Doing Business records taxes and mandatory contributions a medium size company must pay in a year, and measures the administrative burden of paying taxes, contributions and dealing with postfiling processes. Information is also compiled on frequency of filing and payments, time taken to comply with tax laws, time taken to comply with the requirements of postfiling processes and time waiting.

To make data comparable across economies, several assumptions are used:

- TaxpayerCo is a medium-size business that started operations on January 1, 2015. It produces ceramic flowerpots and sells them at retail. All taxes and contributions recorded are paid in the second year of operation (calendar year 2016). Taxes and mandatory contributions are measured at all levels of government.

The VAT refund process:

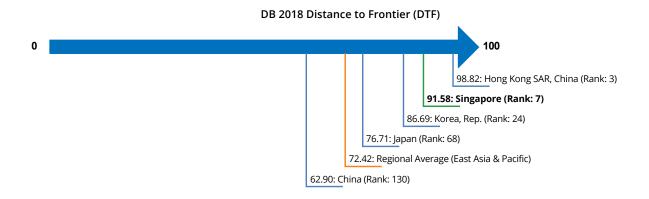

- In June 2016, TaxpayerCo. makes a large capital purchase: the value of the machine is 65 times income per capita of the economy. Sales are equally spread per month (1,050 times income per capita divided by 12) and cost of goods sold are equally expensed per month (875 times income per capita divided by 12). The machinery seller is registered for VAT and excess input VAT incurred in June will be fully recovered after four consecutive months if the VAT rate is the same for inputs, sales and the machine and the tax reporting period is every month. Input VAT will exceed Output VAT in June 2016.

The corporate income tax audit process:

- An error in calculation of income tax liability (for example, use of incorrect tax depreciation rates, or incorrectly treating an expense as tax deductible) leads to an incorrect income tax return and a corporate income tax underpayment. TaxpayerCo. discovered the error and voluntarily notified the tax authority. The value of the underpaid income tax liability is 5% of the corporate income tax liability due. TaxpayerCo. submits corrected information after the deadline for submitting the annual tax return, but within the tax assessment period.

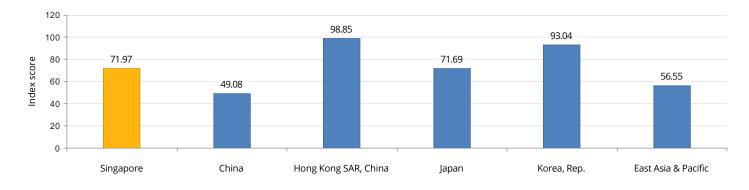

Doing Business 2018	Singapore				
Indicator		Singapore	East Asia & Pacific	OECD high income	Overall Best Performer
Payments (number per yea	ır)	5	21.8	10.9	3 (Hong Kong SAR, China)
Time (hours per year)		64	189.2	160.7	55 (Luxembourg)
Total tax and contribution	rate (% of profit)	20.3	33.6	40.1	18.47% (32 Economies)
Postfiling index (0-100)		71.97	56.55	83.45	99.38 (Estonia)

Note: The ranking of economies on the ease of paying taxes is determined by sorting their distance to frontier scores on the ease of paying taxes. These scores are the simple average of the distance to frontier scores for each of the four component indicators – number of tax payments. time, total tax rate and postfiling index – with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax rate. The nonlinear distance to frontier for the total tax rate is equal to the distance to frontier for the total tax rate to the power of 0.8. The threshold is defined as the total tax rate at the 15th percentile of the overall distribution for all years included in the analysis up to and including Doing Business 2015, which is 26.1%. All economies with a total tax rate below this threshold receive the same score as the economy at the threshold.

Details – Paying Taxes in Singapore – Tax by Type

Taxes by type	Answer
Profit tax (% of profit)	1.5
Labor tax and contributions (% of profit)	17.8
Other taxes (% of profit)	1.1

	Answer	Score
Postfiling index (0-100)		71.97
VAT refunds		
Does VAT exist?	Yes	
Does a VAT refund process exist per the case study?	Yes	
Restrictions on VAT refund process	None	
Percentage of cases exposed to a VAT audit (%)	50% - 74%	
Is there a mandatory carry forward period?	No	
Time to comply with VAT refund (hours)	4.5	91
Time to obtain a VAT refund (weeks)	21.1	65.5
Corporate income tax audits		
Does corporate income tax exist?	Yes	
Percentage of cases exposed to a corporate income tax audit (%)	50% - 74%	
Time to comply with a corporate income tax audit (hours)	17.0	71.56
Time to complete a corporate income tax audit (weeks)	12.9	59.82

Notes: Names of taxes have been standardized. For instance income tax, profit tax, tax on company's income are all named corporate income tax in this table.

The hours for VAT include all the VAT and sales taxes applicable.

The hours for Social Security include all the hours for labor taxes and mandatory contributions in general.

The postfiling index is the average of the scores on time to comply with VAT refund, time to obtain a VAT refund, time to comply with a corporate income tax audit and time to complete a corporate income tax audit.

N/A = Not applicable.

🔜 Trading across Borders

Doing Business records the time and cost associated with the logistical process of exporting and importing goods. Doing Business measures the time and cost (excluding tariffs) associated with three sets of procedures—documentary compliance, border compliance and domestic transport—within the overall process of exporting or importing a shipment of goods. The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

Given the importance of trade digitalization, in Doing Business 2018, the Trading across Borders questionnaire included research questions on the availability and status of implementation of Electronic Data Interchange (EDI) and Single Window (SW) systems. With this information, Doing Business built a comprehensive dataset on the adoption and level of sophistication of electronic platforms in 190 economies. These data are not used to compute the distance to frontier score or ranking of the ease of doing business. The new dataset on EDI and SW systems is available here.

What the indicators measure

Documentary compliance

- Obtaining, preparing and submitting documents during transport, clearance, inspections and port or border handling in origin economy
- Obtaining, preparing and submitting documents required by destination economy and any transit economies
- Covers all documents required by law and in practice, including electronic submissions of information

Border compliance

- Customs clearance and inspections
- Inspections by other agencies (if applied to more than 20% of shipments)
- Handling and inspections that take place at the economy's port or border

Domestic transport

- Loading or unloading of the shipment at the warehouse or port/border
- Transport between warehouse and port/border
- Traffic delays and road police checks while shipment is en route

Case study assumptions

To make the data comparable across economies, a few assumptions are made about the traded goods and the transactions:

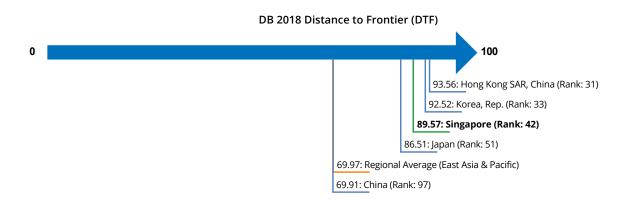

Time: Time is measured in hours, and 1 day is 24 hours (for example, 22 days are recorded as 22×24=528 hours). If customs clearance takes 7.5 hours, the data are recorded as is. Alternatively, suppose documents are submitted to a customs agency at 8:00a.m., are processed overnight and can be picked up at 8:00a.m. the next day. The time for customs clearance would be recorded as 24 hours because the actual procedure took 24 hours.

Cost: Insurance cost and informal payments for which no receipt is issued are excluded from the costs recorded. Costs are reported in U.S. dollars. Contributors are asked to convert local currency into U.S. dollars based on the exchange rate prevailing on the day they answer the questionnaire. Contributors are private sector experts in international trade logistics and are informed about exchange rates.

Assumptions of the case study: - For all 190 economies covered by Doing Business, it is assumed a shipment is in a warehouse in the largest business city of the exporting economy and travels to a warehouse in the largest business city of the importing economy. - It is assumed each economy imports 15 metric tons of containerized auto parts (HS 8708) from its natural import partner—the economy from which it imports the largest value (price times quantity) of auto parts. It is assumed each economy exports the product of its comparative advantage (defined by the largest export value) to its natural export partner-the economy that is the largest purchaser of this product. Shipment value is assumed to be \$50,000. - The mode of transport is the one most widely used for the chosen export or import product and the trading partner, as is the seaport, or land border crossing. - All electronic information submissions requested by any government agency in connection with the shipment are considered to be documents obtained, prepared and submitted during the export or import process. - A port or border is a place (seaport, airport or land border crossing) where merchandise can enter or leave an economy. -Relevant government agencies include customs, port authorities, road police, border guards, standardization agencies, ministries or departments of agriculture or industry, national security agencies and any other government authorities.

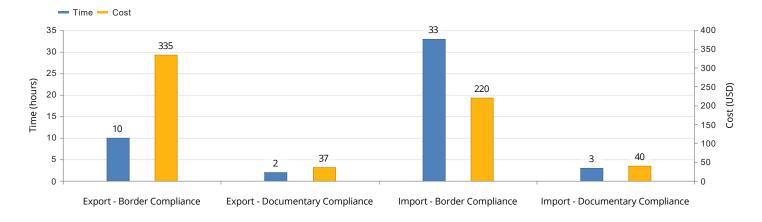

Indicator	Singapore	East Asia & Pacific	OECD high income	Overall Best Performer
Time to export: Border compliance (hours)	10	55.9	12.7	0 (17 Economies)
Cost to export: Border compliance (USD)	335	387.5	149.9	0.00 (19 Economies)
Time to export: Documentary compliance (hours)	2	68.2	2.4	1.0 (25 Economies)
Cost to export: Documentary compliance (USD)	37	112.1	35.4	0.00 (19 Economies)
Time to import: Border compliance (hours)	33	70.5	8.7	0.00 (21 Economies)
Cost to import: Border compliance (USD)	220	431.0	111.6	0.00 (27 Economies)
Time to import: Documentary compliance (hours)	3	65.6	3.5	1.0 (30 Economies)
Cost to import: Documentary compliance (USD)	40	111.4	25.6	0.00 (30 Economies)

Note: The ranking of economies on the ease of trading across borders is determined by sorting their distance to frontier scores for trading across borders. These scores are the simple average of the distance to frontier scores for the time and cost for documentary compliance and border compliance to export and import (domestic transport is not used for calculating the ranking).

🧰 Enforcing Contracts

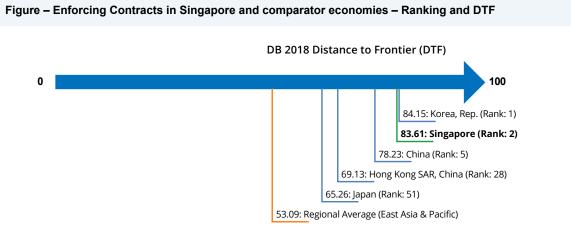

The enforcing contracts indicator measures the time and cost for resolving a commercial dispute through a local first-instance court, and the quality of judicial processes index, evaluating whether each economy has adopted a series of good practices that promote quality and efficiency in the court system. The most recent round of data collection was completed in June 2017. See the methodology for more information.

What the indicators measure **Case study assumptions** Time required to enforce a contract through the The dispute in the case study involves the breach of a sales contract courts (calendar days) between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes • Time to file and serve the case the case from simple debt enforcement. Time for trial and to obtain the judgment To make the data comparable across economies, Doing Business uses • Time to enforce the judgment several assumptions about the case: Cost required to enforce a contract through the - The dispute concerns a lawful transaction between two businesses (Seller courts (% of claim) and Buyer), both located in the economy's largest business city. For 11 economies the data are also collected for the second largest business city. • Attorney fees - The buyer orders custom-made goods, then fails to pay. Court fees - The value of the dispute is 200% of the income per capita or the Enforcement fees equivalent in local currency of USD 5,000, whichever is greater. - The seller sues the buyer before the court with jurisdiction over Quality of judicial processes index (0-18) commercial cases worth 200% of income per capita or \$5,000. • Court structure and proceedings (-1-5) - The seller requests a pretrial attachment to secure the claim. • Case management (0-6) - The dispute on the quality of the goods requires an expert opinion. Court automation (0-4) - The judge decides in favor of the seller; there is no appeal. - The seller enforces the judgment through a public sale of the buyer's • Alternative dispute resolution (0-3) movable assets.

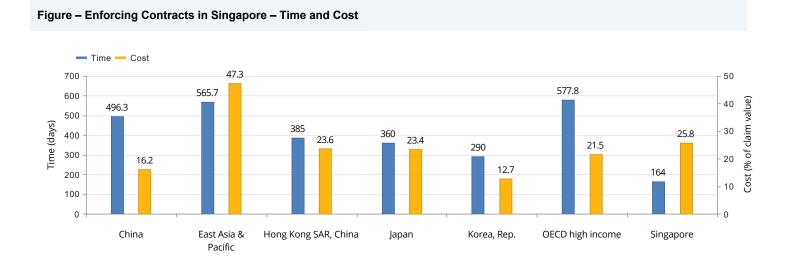

Standardized Case

2. Mediation/Conciliation			0.5
2.a. Is voluntary mediation or conciliation available?		Yes	
2.b. Are mediation, conciliation or both governed by a cons consolidated chapter or section of the applicable code of c encompassing substantially all their aspects?		No	
2.c. Are there financial incentives for parties to attempt me if mediation or conciliation is successful, a refund of court f credits or the like)?		No	

Resolving Insolvency

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recovered by secured creditors through reorganization, liquidation or debt enforcement (foreclosure or receivership) proceedings. To determine the present value of the amount recovered by creditors, Doing Business uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit.

The most recent round of data collection for the project was completed in June 2017. See the methodology for more information.

What the indicators measure

Time required to recover debt (years)

- Measured in calendar years
- Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate)

- Measured as percentage of estate value
- Court fees
- Fees of insolvency administrators
- Lawyers' fees
- Assessors' and auctioneers' fees
- Other related fees

Outcome

• Whether business continues operating as a going concern or business assets are sold piecemeal

Recovery rate for creditors

- Measures the cents on the dollar recovered by secured creditors
- Outcome for the business (survival or not) determines the maximum value that can be recovered
- Official costs of the insolvency proceedings are deducted
- Depreciation of furniture is taken into account
- Present value of debt recovered

Strength of insolvency framework index (0-16)

- Sum of the scores of four component indices:
- Commencement of proceedings index (0-3)
- Management of debtor's assets index (0-6)
- Reorganization proceedings index (0-3)
- Creditor participation index (0-4)

Case study assumptions

To make the data on the time, cost and outcome comparable across economies, several assumptions about the business and the case are used:

- A hotel located in the largest city (or cities) has 201 employees and 50 suppliers. The hotel experiences financial difficulties.

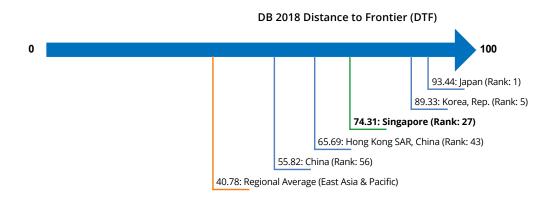

- The value of the hotel is 100% of the income per capita or the equivalent in local currency of USD 200,000, whichever is greater.

- The hotel has a loan from a domestic bank, secured by a mortgage over the hotel's real estate. The hotel cannot pay back the loan, but makes enough money to operate otherwise.

In addition, Doing Business evaluates the adequacy and integrity of the existing legal framework applicable to liquidation and reorganization proceedings through the strength of insolvency framework index. The index tests whether economies adopted internationally accepted good practices in four areas: commencement of proceedings, management of debtor's assets, reorganization proceedings and creditor participation.

Overall Best Performer
93.1 (Norway)
0.4 (Ireland)
1.00 (Norway)
15.00 (6 Economies)
OV6

Figure – Resolving Insolvency in Singapore and comparator economies – Ranking and DTF

Note: The ranking of economies on the ease of resolving insolvency is determined by sorting their distance to frontier scores for resolving insolvency. These scores are the simple average of the distance to frontier scores for the recovery rate and the strength of insolvency framework index.

Doing Busines	s 2018 Singa	pore
Details – Resolv	ing Insolvency in §	Singapore
Indicator	Answer	Explanation
Proceeding	receivership	Upon Mirage's default, BizBank will try to appoint a receiver in accordance with the loan agreement to recover its money. It's likely that Mirage will challenge this appointment, after which BizBank will file an application to the High Court. Then the court will appoint a receiver, who will try to sell Mirage as a going concern in order to maximize the return to BizBank. This will be in-court receivership.
Outcome	going concern	The hotel will continue operating as a going concern after the receivership procedure, since the receiver and manager will seek to sell Mirage as a going concern to maximize the return for BizBank.
Time (in years)	0.8	The receivership procedure until BizBank is repaid some or all of the money owed to it takes approximately 9 months.
Cost (% of estate)	4.0	The costs associated with the case would amount to approximately 4% of the value of the debtor's estate. Costs incurred during the entire insolvency process mainly include attorneys' fees (0,75%), receiver's fees (3%), and auctioneer's fees (0,6%).
Recovery rate (o dollar)	cents on the	88.7

Details – Resolving Insolvency in Singapore – Measure of Quality

	Answer	Score
Strength of insolvency framework index (0-16)		8.5
Commencement of proceedings index (0-3)		3.0
What procedures are available to a DEBTOR when commencing insolvency proceedings?	(a) Debtor may file for both liquidation and reorganization	1.0
Does the insolvency framework allow a CREDITOR to file for insolvency of the debtor?	(a) Yes, a creditor may file for both liquidation and reorganization	1.0
What basis for commencement of the insolvency proceedings is allowed under the insolvency framework?	(a) Debtor is generally unable to pay its debts as they mature	1.0
Management of debtor's assets index (0-6)		4.0
Does the insolvency framework allow the continuation of contracts supplying essential goods and services to the debtor?	No	0.0
Does the insolvency framework allow the rejection by the debtor of overly burdensome contracts?	Yes	1.0
Does the insolvency framework allow avoidance of preferential transactions?	Yes	1.0
Does the insolvency framework allow avoidance of undervalued transactions?	Yes	1.0
Does the insolvency framework provide for the possibility of the debtor obtaining credit after commencement of insolvency proceedings?	Yes	1.0
Does the insolvency framework assign priority to post-commencement credit?	(c) No priority is assigned to post- commencement creditors	0.0
Reorganization proceedings index (0-3)		0.5
Which creditors vote on the proposed reorganization plan?	(a) All creditors	0.5
Does the insolvency framework require that dissenting creditors in reorganization receive at least as much as what they would obtain in a liquidation?	No	0.0
Are the creditors devided into classes for the purposes of voting on the reorganization plan, does each class vote separately and are creditors in the same class treated equally?	No	0.0
Creditor participation index (0-4)		1.0

Doing Business 2018		Singapore		
	Does the insolvency fran appointment of the inso	nework require approval by the creditors for selection or lvency representative?	No	0.0
	Does the insolvency framework require approval by the creditors for sale of substantial assets of the debtor?		No	0.0
	Does the insolvency fran information from the ins	nework provide that a creditor has the right to request solvency representative?	No	0.0
	•	nework provide that a creditor has the right to object to ejecting creditors' claims?	Yes	1.0

Note: Even if the economy's legal framework includes provisions related to insolvency proceedings (liquidation or reorganization), the economy receives 0 points for the strength of insolvency framework index, if time, cost and outcome indicators are recorded as "no practice".

Labor Market Regulation

Doing Business presents the data for the labor market regulation indicators in an annex. The report does not present rankings of economies on these indicators or include the topic in the aggregate distance to frontier score or ranking on the ease of doing business. Detailed data collected on labor market regulation are available on the Doing Business website (http://www.doingbusiness.org/data/exploretopics/labor-market-regulation).

The most recent round of data collection was completed in June 2017. See the methodology for more information.

What the indicators measure

Hiring

(i) whether fixed-term contracts are prohibited for permanent tasks; (ii) maximum cumulative duration of fixed-term contracts; (iii) length of the probationary period; (iv) minimum wage.

Working hours

(i) maximum number of working days allowed per week; (ii) premiums for work: at night, on a weekly rest day and overtime; (iii) whether there are restrictions on work at night, work on a weekly rest day and for overtime work; (iv) whether nonpregnant and nonnursing women can work same night hours as men; (v) length of paid annual leave.

Redundancy rules

(i) whether redundancy can be basis for terminating workers; (ii) whether employer needs to notify and/or get approval from third party to terminate 1 redundant worker and a group of 9 redundant workers; (iii) whether law requires employer to reassign or retrain a worker before making worker redundant; (iv) whether priority rules apply for redundancies and reemployment.

Redundancy cost

(i) notice period for redundancy dismissal; (ii) severance payments due when terminating a redundant worker.

Job quality

(i) whether law mandates equal remuneration for work of equal value and nondiscrimination based on gender in hiring; (ii) whether law mandates paid or unpaid maternity leave; (iii) length of paid maternity leave; (iv) whether employees on maternity leave receive 100% of wages; (v) availability of five fully paid days of sick leave a year; (vi) eligibility requirements for unemployment protection.

Case study assumptions

To make the data comparable across economies, several assumptions about the worker and the business are used.

The worker:

- Is a cashier in a supermarket or grocery store, age 19, with one year of work experience.

- Is a full-time employee.

- Is not a member of the labor union, unless membership is mandatory.

The business:

- Is a limited liability company (or the equivalent in the economy).

- Operates a supermarket or grocery store in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.

- Has 60 employees.

- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.

- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

Details – Labor Market Regulation in Singapore

	Answer			
Hiring				
Fixed-term contracts prohibited for permanent tasks?	No			
Maximum length of a single fixed-term contract (months)	No limit			
Maximum length of fixed-term contracts, including renewals (months)	No limit			
Minimum wage applicable to the worker assumed in the case study (US\$/month)	0.0			
Ratio of minimum wage to value added per worker	0.0			
Maximum length of probationary period (months)	6.0			
Working hours				
Standard workday	8.0			
Maximum number of working days per week	6.0			
Premium for night work (% of hourly pay)	0.0			
Premium for work on weekly rest day (% of hourly pay)	100.0			
Premium for overtime work (% of hourly pay)	50.0			
Restrictions on night work?	No			
Whether nonpregnant and nonnursing women can work the same night hours as men	Yes			
Restrictions on weekly holiday?	No			
Restrictions on overtime work?	No			
Paid annual leave for a worker with 1 year of tenure (working days)	7.0			
Paid annual leave for a worker with 5 years of tenure (working days)	11.0			
Paid annual leave for a worker with 10 years of tenure (working days)	14.0			
Paid annual leave (average for workers with 1, 5 and 10 years of tenure, in working days)	10.7			
Redundancy rules				
Dismissal due to redundancy allowed by law?	Yes			
Third-party notification if one worker is dismissed?	No			
Third-party approval if one worker is dismissed?	No			
Third-party notification if nine workers are dismissed?	Yes			
Third-party approval if nine workers are dismissed?	No			

Doing Business 2018 Singapore					
Retraining or reassignment obligation before redundancy?	No				
Priority rules for redundancies?	No				
Priority rules for reemployment?	No				
Redundancy cost					
Notice period for redundancy dismissal for a worker with 1 year of tenure	1.0				
Notice period for redundancy dismissal for a worker with 5 years of tenure	4.0				
Notice period for redundancy dismissal for a worker with 10 years of tenure	4.0				
Notice period for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	3.0				
Severance pay for redundancy dismissal for a worker with 1 year of tenure	0.0				
Severance pay for redundancy dismissal for a worker with 5 years of tenure	0.0				
Severance pay for redundancy dismissal for a worker with 10 years of tenure	0.0				
Severance pay for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	0.0				
Job quality					
Equal remuneration for work of equal value?	No				
Gender nondiscrimination in hiring?	No				
Paid or unpaid maternity leave mandated by law?	Yes				
Minimum length of maternity leave (calendar days)?	105.0				
Receive 100% of wages on maternity leave?	Yes				
Five fully paid days of sick leave a year?	Yes				
Unemployment protection after one year of employment?	No				
Minimum contribution period for unemployment protection (months)?	n.a.				

Business Reforms in Singapore

In the year ending June 1, 2017, 119 economies implemented 264 total reforms across the different areas measured by Doing Business. Doing Business has recorded more than 2,900 regulatory reforms making it easier to do business since 2004. Reforms inspired by Doing Business have been implemented by economies in all regions. The following are the reforms for Singapore implemented since Doing Business 2008.

 \checkmark = Doing Business reform making it easier to do business. χ = Change making it more difficult to do business.

DB2018

Trading across Borders: Singapore made exporting and importing easier by improving infrastructure and electronic equipment at the port.

Resolving Insolvency: Singapore made resolving insolvency easier by establishing a new scheme of arrangement procedure with features of the debtor-in-possession reorganization regime and introducing provisions applicable to prepackaged restructurings.

Labor Market Regulation: Singapore adopted legislation that requires employers with more than 10 employees to notify the Ministry of Manpower if five or more employees are retrenched within any six-month period.

DB2017

Dealing with Construction Permits: Singapore made dealing with construction permits easier by streamlining procedures and improving the online one-stop shop.

Registering Property: Singapore made it easier to transfer a property by introducing an independent mechanism for reporting errors on titles and maps.

Paying Taxes: Singapore made paying taxes easier by introducing improvements to the online system for filing corporate income tax returns and VAT returns. At the same, the social security contribution rate paid by employers increased and the rebate of 30% on vehicle tax expired.

DB2015

Enforcing Contracts: Singapore made enforcing contracts easier by introducing a new electronic litigation system that streamlines litigation proceedings.

DB2014

Registering Property: Singapore made transferring property easier by introducing an online procedure for property transfers.

Getting Credit: Singapore improved its credit information system by guaranteeing by law borrowers' right to inspect their own data.

DB2011

Getting Credit: Singapore improved its credit information system by collecting and distributing information on firms.

DB2010

Starting a Business: Singapore made starting a business easier by combining tax registration with business registration on a single online form.

Dealing with Construction Permits: Singapore made dealing with construction permits easier through new workplace safety and health regulations allowing companies in low-risk industries to submit documents online.

Registering Property: Singapore made registering property easier by upgrading electronic systems and streamlining the administrative procedures of the government agencies involved.

DB2009

Starting a Business: Singapore reduced the time and number of procedures to start a business by simplifying the online startup process. Dealing with Construction Permits: Singapore made dealing with construction permits easier by improving internal data management and processing at agencies involved in the permitting process. *Doing Business 2018* is the 15th in a series of annual reports investigating the regulations that enhance business activity and those that constrain it. The report provides quantitative indicators covering 11 areas of the business environment in 190 economies. The goal of the *Doing Business* series is to provide objective data for use by governments in designing sound business regulatory policies and to encourage research on the important dimensions of the regulatory environment for firms.
